## OVERVIEW

After Jeff Onofrio took AnnieMac Home Mortgage from doing virtually no Renovation Loans to one of the top lenders in the country, it was time for a new challenge. Jeff and his team partnered with SunWest to create Mortgage Possible.

Jeff and his Director of Construction & Renovation, Scott Magee, knew they needed a system that would help them manage their Renovation and Construction book as efficiently as possible. Mortgage Possible also needed a system that would give them the ability to manage a portfolio from the East Coast to the West Coast.

Since Mortgage Possible manages every aspect of their Renovation Loan process, from contractor validations to the final draw, they needed a way for their team to work from one system to keep everyone on the same page and in real time. Mortgage Possible found this with Renovation Lending Software.

## PARTNERING WITH RENOVATION LENDING SOFTWARE

Built in features for Pre-Closing and Post-Closing allows our team to work together in one system which improved our teams visibility of the Renovation loan process.

HUD Consultant Mapping and Software integrations save us hours of time spent doing data entry.

Reduce draw turn times when consultants use the RLS software by reducing draw turn times and eliminating data entry of the draw numbers.

Lowers our company exposure and helps with Risk Mitigation by helping us balance our books with the built-in accounting features, and by helping us stay compliant.

Increased customer satisfactions with referral partners so we can continue to grow our loan volume.

Renovation Lending Software has given us the tools we needed to go to the next level in renovation & construction lending.
